Subject: Microsoft Settlement

The proposed settlement between Microsoft and the DOJ is a very bad idea. The lack of penalty for past misdeeds by Microsoft is going to make it look like they are getting away without paying a price. In the eyes of the common person, this just looks like the ability of a big corporation being able to buy its way out of trouble with the help of money and political connections. Please do not let the common person lose faith in the justice system.

Thank you,

Sincerely,
Gautam Golwala
